|             |   |
|-------------|---|
| Layout:     | NO slate, NO black, followed by content, NO extra frames                                    |
| Levels:     | RGB signals > 0 mV and < 700mV  |
| Title Safe: | 90% within 4x3 center crop area or 90% of 16x9 area if specifically noted (SMPTE RP 2046-2) |
| Timecode:   | NDF if applicable   |

## Audio

|            |                    |                   |
|------------|--------------------|-------------------|
| Codec: PCM | Sample Rate: 48kHz | Bit Depth: 24-bit |
|------------|--------------------|-------------------|

Stereo Channel Assignment (exported as stereo pair, unless dual mono is specifically intended):

1:left      2:right

## File Naming

Ad-ID or other content identifier (no additional characters) with "H" and file extension at the end.

example:      ABCD0001000H.mov

Must be a valid QuickTime Movie file.

## Closed Captioning (optional)

Supplied as an embedded QuickTime closed caption track or separately as SRT

Must be selected in metadata of distribution company or otherwise communicated.

First caption should either "pop-on" after one second of content or "paint-on" after four frames of content.

## Embedded Metadata (optional)

Includes unique content identifier and name of registry. (i.e. Ad-ID.org)

Embedded by MOV MetaEdit (<https://mediaarea.net/MOVMetaEdit>). Readable by MediaInfo and/or MOV MetaEdit.

These specs have been approved and endorsed by the ANA, 4A's, NABA/DPP and IAB Tech Lab to align the industry on a common deliverable. Be advised that AICP (formerly AICE) is currently collaborating with industry leaders to define a new specification that will supersede this one.
